ENHANCING GENOME ENGINEERING AND SYNTHETIC BIOLOGY WITH ROBOTICS AUTOMATION

Briardo Llorente

Australian Genome Foundry, School of Natural Sciences, MACQUARIE University, Sidney, Australia

Contacto: invitado

Robotics automation can significantly accelerate and enhance research and development in genome engineering and synthetic biology. In this talk, I will present our work on the ambitious "Yeast 2.0 project", a global collaborative effort to build the world's first fully synthetic eukaryotic genome, as well as our advancements in microbial genome-wide engineering.
